## ROLLER BURNISHING TOOL FOR PLANE SURFACE

### Contact details

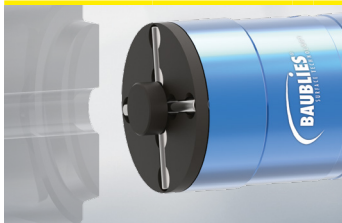

Company	E-mail
Contact	Phone

**For the application please always send us a workpiece drawing.**

### Information on the material

Material	Strength (N/mm <sup>2</sup> )	Hardness (HRC)
----------	-------------------------------	----------------

### Requirements

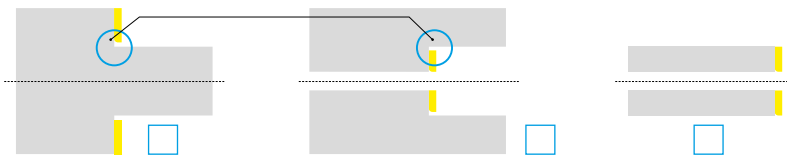

■ Shape and position errors cannot be compensated.

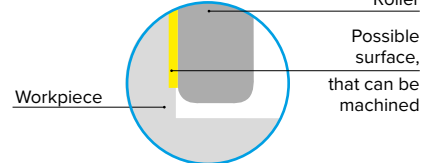

### Application

Which surface quality is to be achieved?	Rz	μm	Ra	μm	Other	μm
Which surface quality can be achieved in the pre-process?	Rz	μm	Ra	μm	Other	μm
Which surfaces are to be machined?						

Please note drawing to the right side

Detailview

Which pre-processing method is used before roller burnishing?

Turning    Grinding    Other process

On which machine is the tool to be used?

Which toolshank/fixture is required?

Are there any other requirements for the tool? If yes, please fill out:

Length max.   Diameter max.   Weight to max.   Others

Which coolant is used?    Oil    Emulsion    Others
